Summary

Product Manager with 1 year as sole PM across two B2B climate-tech SaaS products: led an end-to-end revamp of an LCA platform that doubled revenue through enterprise wins in the UAE, India and UK, and launched a CBAM compliance platform 0→1 from field discovery. Previously an AI engineer shipping ML systems.

Experience

KarbonWise **Aug 2025 – Present**
Product Manager (Founder's Associate) *Hyderabad, India*

- Led an end-to-end revamp of the LCA (Life Cycle Assessment) platform as sole PM with a team of 5 developers, replacing a fragile patch-based codebase and owning discovery, PRD, roadmap and GTM. **Eliminated calculation-error complaints** and **doubled product revenue in 8 months** via enterprise clients in the UAE, India and UK
- Launched a CBAM (EU Carbon Border Adjustment Mechanism) compliance platform **0→1**: surfaced the need with manufacturers at GreenCo, sized the market and benchmarked incumbent tools, then scoped and shipped it; **now live with 3 clients** (2 manufacturers, 1 consultancy), with 2 more on free trials
- Ran discovery with **100+ target-buyer executives** at GreenCo and Chemexpo, translating insights into roadmap priorities and GTM positioning for both products
- Rebuilt the ML engine of third product that maps client materials to emission factors, raising **match accuracy from 45% to 83%** (validated against 70k+ expert-mapped entries) and cutting this onboarding step from **3–4 days of dedicated manual work to under 1 day**
- Built 7 self-serve calculators, creating the **first inbound channel** on a previously outbound-only funnel: **3–5 demo requests/month** and a 19% lift in active site users

RN Architects **Jul 2024 – Jul 2025**
AI Engineer *India – Remote*

- Identified cost estimation as the top client pain point through stakeholder interviews; built and deployed an ML forecasting model that **improved cost-estimate accuracy by 20%** over manual estimates, reducing change-order disputes
- Benchmarked commercial AI design tools against internal workflows and presented a buy-vs-build analysis; leadership used it to defer the investment until setup costs could be justified
- Built a lightweight CRM from zero (data model, intake forms, dashboards), replacing spreadsheet-based client tracking

Ignitus **Dec 2023 – Apr 2024**
Machine Learning Intern *USA – Remote*

- Shipped a client-segmentation model (88.5% accuracy, F1 = 0.84) by diagnosing and resolving a severe class-imbalance bottleneck through SMOTE and threshold tuning

IIIT Kurnool **Dec 2023 – Apr 2024**
In-House Intern (concurrent) *Kurnool, India*

- Built and deployed a medical-assistant chatbot (Mistral-7B, 8-bit quantised LoRA, 100k+ datapoints) for 24/7 campus health support

Education

Indian Institute of Information Technology Design and Manufacturing, Kurnool **Dec 2020 – Jun 2024**
B.Tech, Artificial Intelligence and Data Science

Indian Institute of Technology Madras **May 2022**
Diploma in Data Science

Skills

Product: PRD writing, roadmap prioritisation, GTM, product analytics, journey mapping, Figma
Technical: Python, SQL, machine learning, LLM/GenAI fine-tuning, statistical analysis, Google Cloud

Leadership & Achievements

- **Founder, E-Cell IIITDM Kurnool:** grew from zero to 500+ students and 3 cross-functional teams (11 members); seeded the institute's first incubation centre; represented E-Cell at Global Entrepreneurship Summit 2023, IIT KGP
- **Founder, Yugaantar NGO:** planted 1,000+ trees with the District Collector under Maharashtra's state plantation drive; served 950+ pilgrims and raised Rs. 85K+ in community funds
- **Registered Design, Indian Patent Office:** *AI-Enabled Device for Stock Market Analysis* (396590-001); co-registrant
- **CodeChef 4★** (max rating 1867): global ranks 10, 24 and 27 in coding competitions
